Mountain Weather Forecast

Eryri (Snowdonia) National Park

Forecast valid from 06:00 on Tuesday 10 Sep 2024 until 23:59 on Wednesday 11 Sep 2024

Forecast Issued on Tuesday 10 Sep 2024 at 03:12

Confidence: High confidence for a change to cooler, more unsettled conditions through the week. Lower for detail on the timing for the rain on Tuesday.

Headline for Tuesday 10 Sep 2024: Cloud and rain clearing to give a brighter, breezy afternoon.

Mountain weather hazards on Tuesday 10 Sep 2024

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales Medium Likelihood	**Severe chill effect** Medium Likelihood	**Poor visibility** Medium Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** Low Likelihood	**Strong sunlight** Low Likelihood

Weather and chance of precipitation at 800m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Cloudy	Heavy Rain	Heavy Rain	Sunny intervals	Clear night	Light rain showers (night)
Precipitation probability					
50%	70%	50%	10%	10%	30%

Forecast for Tuesday 10 Sep 2024

Weather: Cloudy with outbreaks of rain and drizzle for many parts during the start of the day. Rain becoming locally heavy for a time late morning but clearing into the afternoon to bring brighter skies. Becoming largely dry into the second half of the day with some sunny spells, but the risk of the odd shower into the evening and fresh blustery winds throughout will give a cold feel at height.

Chance of cloud-free hill tops above 800m: 30% during the morning increasing to 90% into the afternoon.

Low Cloud and visibility: Widespread cloud obscuring hills above 500-600m for much of the morning, though the occasional break possible. Cloud breaking into the afternoon as rain clears, with bases generally rising above summits. Visibility widely moderate through the morning, locally poor or very poor at height, but improving to become generally excellent into the afternoon, though some reductions to possible in any showers.

Freezing Level*	2300m	2100m	1600m	1400m	1400m	1300m	1200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Strong west-northwesterly winds give a noticeable wind chill at height, with a risk of gale force winds across the highest peaks during the morning and some poor walking conditions likely as the early rain moves through. Despite the cooler conditions there will likely be some good brightness into the afternoon however with Moderate UV levels possible.

Forecast for Wednesday 11 Sep 2024

Weather: A cool breezy day with strong northwesterly winds. Sunny spells and frequent blustery showers expected, and with freezing levels close to summits some brief sleet or perhaps wet snow is possible over the highest tops.

Maximum wind: Northwesterly 35-40mph gusting 45-50mph.

Chance of cloud-free hill tops above 800m: 70%.

Low Cloud and visibility: Scattered cloud with bases generally 800-1000m, falling briefly lower in association with showers, although cloud moving through very quickly. Visibility generally excellent but falling sharply in showers.

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 10 Celsius.
At 800m: Plus 2 Celsius.
Freezing level: 1200-1400m
